LED APPLICATIONS

FAÇADE

Offering professional visual façade lighting solutions for building exterior that are iconic from afar.

GINS can create impressive visualisation of the exterior of just about any building. Lighting compliments the exterior. In architecture, the facade of a building is often the most important from a design standpoint, as it sets the tone for the rest of the building, hence our belief "first impressions matter, light up".

The facade lighting helps localize buildings and highlights architectural expression. GINS provides outdoor lighting fixtures in different colours, finishes and material types. All go to compliment the exterior of the building and the area of use.

LED Product Range

Request for product cut sheets for detailed specifications.
